Backroom/Prep Person

☐ Initial ☐ Verification ☐ Follow-up

Objective: To supply enough stocks in service and kitchen area prior to high volume. Follow the Stocks build according to volume projected and ensure FIFO for all products, while maintaining cleanliness and organization.

Food safety First:

Always observe and follow the following food safety measures to keep yourself healthy.

- ☐ Observe proper hygiene: wear clean uniform & take bath daily.
- ☐ Wash hands every hour or as needed using KG8 for 20 seconds
- ☐ Avoid touching mouth, nose, and eyes as much as possible specially if wearing gloves.
- ☐ If you feel any symptoms of illness such as cough, colds, sore throat, or fever immediately inform your manager & consult a doctor.
- ☐ Always wear gloves and hairnet whenever inside the work premises, change it when needed.
- ☐ Remove apron when you are going out of the kitchen

Quality:

Tips: Always follow TLC (tender loving care) when handling any products.

☐ Wash hands Procedure

1. Wet your hands with warm running water
2. Apply Soap
3. Scrub hands and arms for at least 20 seconds. Clean under fingernails and between fingers.
4. Rinse thoroughly under running water
5. Dry hands and arms with a single-use paper towel
6. Rinse thoroughly under running water

☐ Procedure in Cleaning and Sanitizing Equipment

Small equipment must be sanitizing every 4 hours or as needed following the right cleaning procedure:

1. Pre-rinse the small equipment
2. Wash with multi-Purpose detergent
3. Rinse the small equipment
4. Soak it in sanitizer for 60 seconds
5. Air dry

☐ Hygiene

Ensure the following are adhered to:

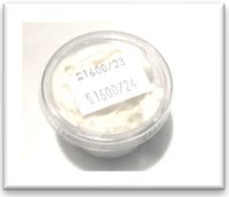
- Employee must not be sick
- Hourly hand washing consistently follow
- Staff are wearing white gloves, change when needed
- Staff wearing clean and complete uniform
- Staff wearing hairnet and cap
- Fingernails are trimmed and clean
- Aprons are washed and cleaned everyday

☐ Sauce preparation

Prepare the following

- Clean and sanitized, calibrated 2/3 & 1/2 sauce gun
- Clean and sanitized portion pal with yellow ring attached to it
- Souffle cups and lids
- Big J sauce tube, Tasty sauce tube, Mayonnaise sauce tube, Smokey sauce tube, Dijon sauce tube and Spicy mayonnaise sauce tube.
- Pouch mate
- Timer
- Clean and sanitize tray with liner

☐ On the side Sauce Procedure (Honey Mustard & BBQ)



- Label each cup with 48-hours secondary shelf life (Time and Date)
- Prepare the sauce tube and place it into the squeeze bottle.
- Put the two-ounce cup into sanitized tray with liner
- Place the two-ounce cup and dispense the sauce into each cup then put the lid. Continue the process until enough sauce is prepared for the whole shift.

☐ Preparing Slice Tomato

Use only the quality tomatoes.

1. Sort quality Tomatoes (Tomatoes feel firm to the touch but yield slightly under gentle pressure. They should not be overly soft or mushy, which could indicate over ripeness or spoilage). Acknowledge the quantity from your manager.

To Waste

Leave to ripen

Acceptable Quality, use first

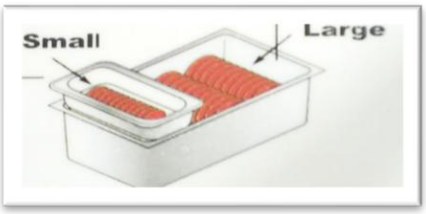
2. Clean the Tomato in cold water with veggie wash, soak tomato for at least 90 seconds.

Backroom/Prep Person

☐ Initial ☐ Verification ☐ Follow-up

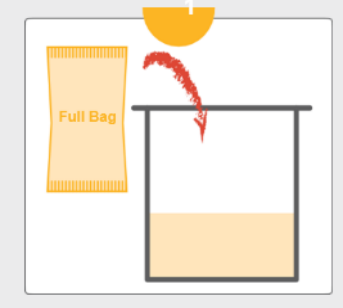
3. Rinse and cut it using the Tomato Slicer.

4. Put the secondary shelf life of 3 hours in the container lid of tomatoes.



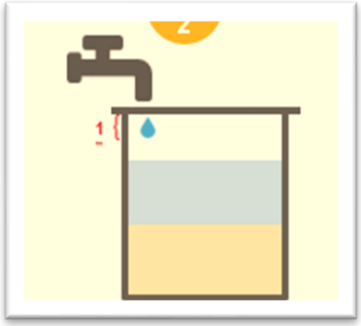
Secondary Shelf life – 30mins in dressing table

☐ Proper Onion Hydration Procedures

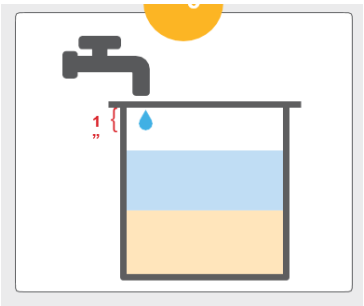


☐ Add dehydrated onions to the pan.

☐ Do not hydrate onions in the perforated pan.



☐ Add hot filtered water from to 2.5 cm. (1 in.) or below rim. Stir the Onions and water with a clean hutzler spatula.
Do not use warm or Hot water, as it results in pink onions.
The Onion skin that are found floating above the water needs to be taken off with the help of the strainer. The longer the onions are soaked it will enhance the flavour.

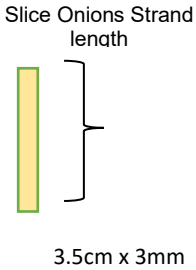


☐ Cover then label with 24 hours holding time and place in walk-in cooler (allow a minimum of one hour for onions to reconstitute). Soaking less than one hour causes chewy onion pieces due to incomplete reconstitution.

☐ Preparing Onions for use:

- Empty contents into perforated pan over large pan in kitchen area.
- Shake gently and stir with hutzler spatula to fully drain onions.
- Insert perforated pan into the bottom pan.
- Fill onion shakers using a poodle or return to a walk-in cooler.

☐ Preparation of Slice White Onions



1. Confirm quantity with the manager
2. Remove heads from each side.
3. Remove first layer of Onions. Second layer maybe removed if necessary.
4. Soak Onions into the cool water with Veggie wash Solution for at least **90 seconds**. Rinse peeled onion properly in the cold tap water
5. Cut onion into halves.
6. Cut the onions in 3mm width and 3.5 cm long slices vertically
7. Indicate the following information on the label. Type of product, prepared by time prepared, ready at, Waste at.

Holding Time of Slivered Onions is 4 hours (secondary shelf-life). Primary: Usage for 3 days

Vegetable Wash Procedure

1. Add 1 tablet of Vegi Wash to Vegetable sink filled with 10 gal/38L cool (60°F-80°/16°C-27°C) water and stir for a 25-ppm solution.
2. Check for 25 ppm chlorine concentration. Dip the strip in solution and remove quickly. Blot towel and compare to color chart at once.
3. Soak Onions or Tomatoes for 90 seconds then wash thoroughly before cutting.

QUALITY: After receiving and washing tomatoes ensure that the Tomatoes during storage place inverted and 1 inch apart inside the walk-in cooler.

Backroom/Prep Person

☐ Initial ☐ Verification ☐ Follow-up

☐ **Lettuce Preparation**

1. Following pull chart, remove needed loaves of cheese from the Walk-in Cooler and have your airtight containers and lids staged. In this example, we use the 2.5 in. full size pan and lid

- Confirm to your Production Manager on the quantity of Shredded lettuce usage for 2 hours
- Place the Shredded lettuce into 2" Deep Pans
  Put 2 hours holding time on the kid of the Pan.

Other dressing sauce, condiments and paper products follow the **24/2 build to's**.

Thawing Procedure of Buns

1. Confirm with the Production Manager /MIC quantity of Buns to be thawed.
2. Make sure to organize the bun tray prior thawing of buns. Never place the bun boxes on floor.
3. Wear a Freezer Jacket and gloves before entering in the Walk-in Freezer (Don't go inside the Walk-in freezer during defrost time).
4. Transfer the buns boxes from Walk in Freezer into stockroom or thawing area.
5. Remove the inners gently from the box and transfer it into the bun tray (12 inners per Bun Tray). Verify the Expiry, ensure FIFO.
6. Put the Secondary shelf life for 48 hours including 4 hours thawing time.
   Note: For Frozen buns in boxes the stacking height is 3 cases. For the Buns within trays stacking height 12 trays.

Proper Storage and Handling buns:

- 4-hour thawing time
- Follow bun thaw pull chart
- Ensure buns are being pulled twice a day
- Follow FIFO (FIRST EXPIRY FIRST OUT)
- Keep open pillow sealed when not in use.

Tempering Cheese Procedure

Using delivers properly melted, gooey, deliciousness to our burgers! It also ensures our burgers stay hot and don't get cooled down from a cold piece of cheese!

Tempered Cheese Temp - 16°C-18°C/60°F-18°F

2. Divide the loaf into 8 stacks total. (Easily done by dividing the 4 stacks in the package in half). Label the pan with the refrigerated secondary shelf life and place in Walk-in Cooler for later use or move directly to tempering.

3. Based on your temper chart, pull the needed covered pans of cheese and label them with tertiary shelf life in ambient temperature (this time will include temper time and use at prep table).

4. From your tempered covered pans, pull what you need onto the prep table. Make sure you use FIFO with your staging between pans. **Note:** ***When not covered on the prep table, ensure the cheese is not out for longer than 2 hours. Edges will start to dry out.***

Re-stocks Beef Patties and Chicken Portion

1. Acknowledge the quantity to stocks from your manager stocks.
2. Stocks beef patty and chicken portion usage for 2 hours.

NOTE:

For Towel Cleaning & Dishwashing procedure refer **Training Checklist of Clean & Sanitary.**

TEST YOUR KNOWLEDGE

2pts. each

1. Secondary shelf life of tomato
   a. 2 hours
   b. 3 hours
   c. 4 hours
   d. 5 hours

2. Sliced onion strand length width
   a. 3mm
   b. 4mm
   c. 3.5mm
   d. 4.5mm

3. Which of the following is the correct handwashing procedure?
   a) Wet hands, apply soap, scrub for 5 seconds, rinse, dry with a towel
   b) Wet hands, apply soap, scrub for at least 20 seconds, rinse, dry with a paper towel
   c) Wet hands, apply soap, scrub for 10 seconds, rinse, air dry
   d) Wet hands, scrub with detergent, rinse with hot water, dry with a towel

4. How often should small equipment be sanitized in a high-volume kitchen?
   a) Every 2 hours
   b) Every 4 hours or as needed
   c) Every 8 hours
   d) Once at the start of each day

5. What is the correct temperature range for tempering cheese?
   a) -10°C-18°C (50°F-54°F)
   b) -16°C-18°C (60°F-18°F)
   c) 20°C-22°C (68°F-40°F)
   d.) None of the above

TRUE or FALSE

6. **It is acceptable to use the same pair of gloves for handling raw meat and ready-to-eat foods.**
   True / False

7. **The secondary shelf life for sliced tomatoes is 2 hours at the dressing table and 1 hour in the cooler.**
   True / False

8. **When preparing onions, the first layer should be removed, but the second layer can be left if not necessary.**
   True / False

9. **All sauces should be labeled with a 24-hour secondary shelf life after being prepared.**
   True / False

10. **It is acceptable to store tomatoes in the walk-in cooler without spacing them at least 1 inch apart.**
    True / False
